

Intake Form Socie App

Welcome to Socie! The Socie App allows you to communicate, share moments, exchange files, plan events and much more. The Socie App provides one central and secure place for group communication, where members can communicate with each other and become truly connected. The Socie App is completely customizable, making each community unique. This questionnaire is designed to get a better idea of the needs of your organization. In this way you will quickly get a good idea of what Socie can do for your organization.

What kind of organization (association/community) do you represent?

Who are the main app users within your organization?

What do you hope to accomplish with the app? What problems do you hope to solve by using the app?

What functionality(s) are essential to you in the app?

What do you want to communicate to members through the app?

Is there already a website with news or agenda items that you would like to display in the app as well?

Would you also like to share documents, files or videos? If so, what kind of content would you like to share?

Would you like an agenda in the app where events, meetings, trainings, get-togethers or meetings can be added? If so, are these multiple (different) agendas?

Would you like to send push notifications? If so, what should these notifications be about?

May community members contact community administrators via e-mail addresses or specific contact information?

Are members allowed to leave comments on the content you share? If so, on what content? (for example, on news items, photos, videos, etc.)

May members or groups also communicate among themselves through the app?

Would you like to create groups within the app, such as departments, teams or establish, for targeted group communication? If so, which ones?

Would you make these groups private or public?

Want to display a member list in the app?

Should members be visible by default or search for members?

By default, a member's address information is displayed as a subtitle in the member list. What information would you like to see displayed as a member subtitle by default?

Socie

Which of the following features would you like to add to the app?

Share your Moment
